Tracking tool for off-axis guiding on comets, by Lars Karlsson.

~~Autoguider — Wikipedia~~

Problem solved. The Orion StarShoot AutoGuider provides a user-friendly, dedicated autoguiding camera for long-exposure astrophotography. It's compatible with virtually any mount equipped with an autoguider port and comes with all the software and cables needed to work right out of the box!

~~Autoguiding a Telescope for Deep Sky Astrophotography ...~~

Making sure a telescope is accurately aligned is a very important step when doing astrophotography and these telescope autoguiders can help. Autoguiders are small sensor cameras that track stars so the astrophotographer can monitor drift alignment before taking their exposures.

~~Autoguiding Solutions | Orion Telescopes: Shop~~

Autoguiding a telescope for deep-sky imaging. Below, I'll explain how to start leveraging the power of autoguiding for deep sky astrophotography. Many amateur astrophotographers are hesitant to add any additional complexity to an already steep learning curve, but the truth is, autoguiding your camera and telescope isn't overly difficult to ...

Lodestar Autoguider Major features: A sensitive USB2.0 guide camera in a miniature package. Exview CCD with 752 x 580 pixels, USB powered, Opto-Isolated control outputs. Specifications: CCD type: ICX429AL Sony Exview interline CCD with low dark current and vertical anti-blooming.

~~Telescope Autoguiders | Astrophotography Autoguiders~~

Stand-Alone autoguider eliminates the need for a laptop computer Sensitive CCD sensor allows you to track on fainter stars Larger chip provides more area for locating and keeping guide star on chip

~~Best Autoguider and Guide Scope for 2020 — Astronomy Online~~

Orion StarShoot AutoGuider. The Orion StarShoot AutoGuider has revolutionized autoguiding and the capture of deep-sky images by mechanizing the tedious and tiring method of manually guiding an exposure, which involved staring endlessly into an illuminated reticle eyepiece while tweaking your mount's electronic drive controls by hand to keep the stars pinpoint sharp.

~~—PHD2 Guiding~~

This autoguider isn't very sensitive, and it's often hard to find guide stars. I spent several weeks trying to get good autoguiding out of it using PHD2, but it would often lose the guide star, and sometimes the entire starfield would just disappear for seconds at a time.

This is part 5 of a series of instructional videos to help you get started in Astrophotography. In this video I discuss Auto Guider options. I cover OAG and Dedicated Guide Scopes. An Auto Guider ...

~~Autoguider~~

An autoguider is an automatic electronic guidance tool used in astronomy to keep a telescope pointed precisely at an object being observed. This prevents the object from drifting across the field of view during long-exposures which would create a blurred or elongated image.
