Building Construction - Civil Engineering Lectures Course Notes Construction. Construction is the process of constructing a building or infrastructure. Construction differs from manufacturing in that manufacturing typically involves mass production of similar items without a designated purchaser, while construction typically takes place on location for a known client.

Engineering Notes Handwritten class Notes Old Year Exam ...

Everything inside a building which makes it safe and comfortable to be in comes under the title of 'Building Services'. A building must do what it was designed to do - not just provide shelter but also be an environment where people can live, work and achieve. 2 3. Building services are "what makes a building come to life".
