The Free Dictionary*

The Crocodile is a large aquatic reptile that lives throughout the Tropics in Africa, Asia, the Americas and Australia. Crocodiles tend to congregate in freshwater habitats like rivers, lakes, wetlands and sometimes in brackish water (water that is saltier than fresh water, but not as salty as seawater). Some species, particularly the Saltwater Crocodile of [...]

American Crocodile | National Geographic

Crocodiles. The crocodile order (Crocodylia) consists of several families of large, unmistakable, amphibious reptiles: the crocodiles (Crocodylidae), gavials (Gavialidae), and the alligators and caimans (Alligatoridae). Although these animals look superficially like lizards, they are different in many important respects, and are believed by biologists to be the most highly evolved of the living ...

TOP 10 LARGEST CROCODILES In The World - YouTube

Crocodiles and alligators belong to a group of reptiles called crocodylians, which are the largest of the living reptiles. Of the 23 different species of crocodylians in the world, 2 species are native to the United States, and south Florida is the only place where both of these species coexist.

Freshwater crocs eat fish and small animals such as frogs, lizards, snakes, rats, bats, birds and insects. Like all reptiles, crocodiles rely on the environment to regulate their body temperature.

Crocodiles

Crocodiles (subfamily Crocodylinae) or true crocodiles are large semiaquatic reptiles that live throughout the tropics in Africa, Asia, the Americas and Australia. Crocodylinae, all of whose members are considered true crocodiles, is classified as a biological subfamily. A broader sense of the term crocodile, Crocodylidae that includes Tomistoma, is not used in this article.
