cropping, then, is a
form of farming to
maximize the use of
land each year. The
two major categories of
multiple cropping are
succession cropping
and intercropping.
Systems are often
referred to in
distinguishing one
type of multiple
cropping from another.

Grain-based cropping systems. During winter, vegetables (e.g. cabbage, faba bean, cauliflower, carrot, garlic, potato, etc.), green manure and rapeseed are planted in the paddy fields.

Multiple cropping areas decreased recently due to the shortage of rural labor and the development of the rural economy.
