Simply put, an eco-city
is an ecologically
healthy city. The World
Bank defines eco-cities
as “cities that enhance
the well-being of
citizens and society
through integrated
urban planning and
management that
harness the benefits of

These are the most notable attempts at building new eco-cities to both face up to the 'crises' of the modern world and to use the city as an engine for transition to a low-carbon economy.

Federico Caprotti is Senior Lecturer in Cities and Sustainability at the Department of Geography, King's College London, UK.
