~~Hello, World! How Do Apples Grow?: Jill McDonald ...~~

Apples grow all over the world. China leads the world in production, with almost half of the global harvest originating within its borders. The United States follows China, producing about 6 percent of the global harvest. Turkey, Poland, India, Italy, Iran, Chile, Russia and France are also large producers of the popular fruit. Australia ...

Planting. A dwarfing rootstock might be 4 to 8 feet apart in a row. Dwarf apple trees are notoriously prone to uprooting under the weight of a heavy crop, so you should provide a support system for your hedge. You can grow your trees against a fence, or you can provide free-standing support in the form of a trellis.

~~How Do Apples Grow? —Betsy Maestro—Paperback~~

Growing apples successfully requires fertile soil. Do a soil test before planting to be sure that your trees will have what they need. Apples need a pH range between 6.0-7.0. Amend your soil with peat moss, compost, and bonemeal before putting your tree in the ground to give it a healthy foundation. Spacing

~~Hello, World! How Do Apples Grow? on Apple Books~~

To grow an apple tree from a seed, first get seeds from 2 different kinds of apples and dry them completely. Then cover them with a damp paper towel and put them in an airtight container. Refrigerate them so they'll grow roots, checking daily and spraying the paper towel with water when you need to so it's always moist.

## ~~How Do Apples Grow~~

Apples grow best where there is cold in winter, moderate summer temperatures, and medium to high humidity. Apples can grow from 10 to 30 feet tall and nearly as wide. Apples are moderately fast growing, but growth slows with age. Apple trees can live for 100 years or more.

## ~~How Do Apples Grow? by Betsy Maestro — Goodreads~~

Apples. Perhaps not! In this episode of How Does It Grow?, we get to see the rather surprisingly high-maintenance process of growing these trees, which includes bud grafting, planting different varieties in close proximity to each other, bringing in bees to cross-pollenate the flowers, and protecting against hungry insects.
