How to Wire an NVR Switch with Emergency Stop - YouTube
The next question is HOW best to connect A1 to 24. I have a crimp that will fit the terminal A1, but crimping two wires into the terminal that attaches to 24 seems a very inelegant solution. It seems to me that the designers of this switch did not think very carefully about how it would be wired. Does anyone have a better solution for this wiring?

Referring to the numbered pins on the right hand (old) switch the original wiring was 24 blue - 23 blue & white - 14 brown - 13 brown & white where the thinner white piggybacked wires on 13 & 23 probably connect to the laser spotter fitted to the drill. So the odd man out looks like pin A1 on the new switch. Where do I connect A1 to ? Rik
