The tutorials help beginners learn the basic SQL commands, including SELECT, INSERT INTO, UPDATE, DELETE FROM, and more. Each SQL command comes with clear and concise examples. In addition to the list of SQL commands, the tutorial presents flashcards with SQL functions, such as AVG(), COUNT(), and MAX().

[SQLCourse - Lesson 1: What is SQL?](#)

Since most users will be learning SQL to interact with an existing database, the lessons begin by introducing you to the various parts of an SQL query. The later lessons will then show you how to alter a table (or schema) and create new tables from scratch. Each lesson will introduce a different concept and end with an interactive exercise.
