Seamless Steel Pipe, Tubing and Casing, API 5L line pipe ...
Tubing and casing strings designed for the specific requirements
for conveying gaseous media and combustible liquids or solids.
API 5L steel line pipe is for oil and gas industries pipelines,
developed for different working environments. The steel line pipe
material generally in carbon steel and comply to API SPEC 5L
specifications. Applied for petroleum and natural

Therefore, the casing consumption accounts for over 70% of all the oil well pipe. According by usage can be divided into the sleeve pipe, surface casing, casing and production casing. OCTG Tubing Pipe. OCTG Tubing pipe goes inside the casing pipe because it is the pipe through which oil makes its way out.

~~Casing and Tubing Sales and Services—Baker Tubulars~~

Oil country tubular goods (OCTG) is a group of seamless rolled products comprising of the casing, tubing, and drill pipe subjected to stacking conditions according to their particular application.. Drill pipe is heavy seamless tube that circulates drilling fluid and rotates the drill bit. Pipe segments 30 ft (9m) long are combined with tool joints.

~~Casing Tubing Archives—Pipes and Tubes Supplier~~

Oil casing is used to support the oil, gas wells of steel pipe, in order to ensure the drilling process and the completion of the entire well after the normal operation.Each well has several layers of casing depending on the drilling depth and geology. Casing down to use cement cementing, it and the tubing, drill pipe is different, can not be reused, a one-time consumption of materials.
