Update on the NCEP ATP-III emerging cardiometabolic risk ...

Adult Treatment Panel (ATP), an expert panel to supervise cholesterol management was set up under the aegis of National Cholesterol Education Program (NCEP) in 1985. Since then NCEP-ATP has been revising and framing guidelines to enable clinician to deliver better treatment to cardiovascular patients and to educate general people.

Adult Treatment Panel (ATP III) Calculator - GlobalRPH

Both ATP III and ACC/AHA guidelines carried out 10-year risk assessment to guide drug therapy. ATP III recommended consideration of drug therapy when 10-year risk for CHD was $\geq 10\%$. ACC/AHA set a threshold for statin drugs at 7.5% for ASCVD. Even $\geq 5\%$ risk was considered a therapeutic option for statin therapy.

NCEP-ATP III and IDF criteria for metabolic syndrome

Background Adult Treatment Panel of the National Cholesterol Education Program issued their third guideline for cholesterol management in 2001 - known as ATP III. Since publication, 5 major clinical trials of statin therapy have been published. This has resulted in an addendum to ATP III published in July 2004. Next update (ATP IV) expected in ...
