Works properly only with most Nikon DSLRs and the F6 (and some Coolpix). Does not work properly with any other 35mm camera or any D1-series or the D100.

~~Nikon SB-910 Review—Ken Rockwell~~

The SB-910 is a high-performance Speedlight compatible with Nikon Creative Lighting System (CLS) with a guide number of 34/48 (ISO 100/200, m) (111.5/157.5, ft) (at the 35 mm zoom head position in Nikon FX format with

~~Nikon SB-900—Ken Rockwell~~

The SB-910 is the successor of SB-900, which long-time Nikon fans should know the saga. The SB-900 overheats when heavily used and shuts itself down. By shut down, I literally mean that it locks itself up until the unit is cool enough to work again.

~~SB-910 AF Speedlight | Camera Flash~~

DSLR Cameras can also be used with optional flash units with higher guide numbers. Using an optional flash unit such as the Nikon SB-400 or SB-900 makes it possible to achieve optimal exposure at greater distances than with the built-in flash.
