period 2020 - 2025. The pneumatic tube systems are increasingly finding a place in many internal logistic problems of the producers of various good and services.

## *Design issues Pneumatic Tube Systems in a hospital*

### HOSPITAL PNEUMATIC TUBE SYSTEMS:

Whenever somebody's health is at stake, a quick and efficient management is decisive. With a hospital pneumatic tube system, laboratory samples, units of stored blood or patients' files reach their destination more quickly. This enables the medical staff to spend more time on the patients' care.

## *Pneumatic Tube Systems in Hospitals - Air-Log*

Aerocom is the world leader in pneumatic tube system technology, with 60 years of experience in hospitals and operations in 80 countries. The rapid, dependable arrival of critical care items like lab specimens, blood and medications can make the difference in

## *Hospital Pneumatic Tube Systems - Pevco*

Pneumatic Tube System for Hospital. Sumetzberger pneumatic tube system is an integral part of every modern hospital worldwide, developing from what was once the simple transport of blood samples, blood bags or drugs from point A to point B, to state of the art computer controlled systems.

## *Pneumatic Tube System*

The pneumatic tube transport system has proven itself in hospitals worldwide. Nowadays, clinics all over the world use pneumatic tube systems to send and receive bloodsamples, medical supplies, clinical samples, etc. from one floor or department to the other, without the costs and risks of manpower involved.

## *Pneumatic Tube System For Hospitals - Translogic ...*

Pneumatic Tube Systems can provide major benefits to large institutions where delayed transport of specimens,

drugs, orders and reports produce bottlenecks in the delivery of patient care. Though superficially the technology is not sophisticated, in engineering terms to get the best performance from complete systems, great care must be taken at the design stage.

*Pneumatic tube systems for hospitals, stores and industry ...*

Pneumatic tube systems are also used in hospitals to transport X-rays, patient documents, general documents, drugs and test results. The 6-inch (152 mm) pneumatic tube system handle the heavy liter IV bags with significantly fewer jams compared to the 4-inch (102 mm) systems.
