The main raw materials used for the production of polyurethanes are polyols, isocyanates and propylene oxide.

The first of these is the subject of the latest Rapra Handbook:

Chemistry and Technology of Polyols for Polyurethanes. This book considers the raw materials used to build the polyurethane polymeric architecture.

Many excellent  
volumes have been  
written on the  
chemistry of cellulose  
and its derivatives.  
Judging by the number  
of conferences which  
have been assembled  
to deal with the topic,  
cellulose and its  
derivatives continue to  
arouse great scientific  
interest. Matching this  
interest has been the  
development in  
copolymer science and
