Uploaded By Stan and Jan Berenstain, windows nt 2000 native api reference is absolutely unique currently documentation on windows nts native apis can only be found through access to the source code or occasionally web sites where people have

### ~~UltraDefrag—A Powerful Disk Defragmenter~~

The Native API Reference not only shows you the neat and very useful things that NT can do but does not expose through its Win32 personality; it also tells you which areas are covered by documented Win32 APIs, lessening, one hopes, the gratuitous use of officially undocumented functionality.

### ~~Windows Nt2000 Native Api Reference~~

Windows NT/2000 Native API Reference provides a thorough listing of all available internal or "native" API calls, many of them undocumented. For any advanced C/C++ programmer who writes Win32 device drivers or system utilities, this is an indispensable resource to some truly impossible-to-find information.

### ~~Windows NT/2000 Native API Reference—Gary Nebbett ...~~

Windows NT/2000 native API reference by Gary Nebbett, February 15, 2000, Sams edition, Paperback in English - 1st edition

### ~~Windows Nt2000 Native Api Reference~~

Win32 APIs or Windows APIs are fully documented user mode functions used to invoke several of the operating system services. They normally belong to the Windows subsystem. Most of the Windows APIs internally invoke the Native APIs. Native APIs are mostly undocumented.

~~Solved: Create a user with a specific SID | Experts Exchange~~

Windows NT is a family of operating systems produced by Microsoft, the first version of which was released on July 27, 1993. It is a processor-independent, multiprocessing and multi-user operating system. The first version of Windows NT was Windows NT 3.1 and was produced for workstations and server computers. It was intended to complement consumer versions of Windows that were based on MS-DOS ...

~~Windows NT 2000 Native API Reference by Gary Nebbett ...~~

It didn't take long until Gary Nebbett came up with his outstanding Windows NT/2000 Native API Reference [1] that not only documented this function pair, but all functions that are part of the Native API. Great work, Gary!

### ~~What is the difference between native api and win32 api?~~

ActiveX NT user accounts - this object just uses the NetAPI. Windows NT/2000 Native API Reference - this looks good. Is the same info available online anywhere? SysInternals has some, but not a complete reference. What I really need to know is if NetAddUser() is the lowest level interface available for creating users in the SAM database.

### ~~Windows NT - Wikipedia~~

All system calls are beginning with letters Nt where as Native API is consisting of lot of functions which are not beginning with letters Nt. System Call of windows are subset of Native API. ... It is a bit out of date, but Inside Windows 2000 covers this I think.

Finding the code for a certain Native API Function: If the name of the Native API Function starts with "Nt", then the export in ntoskrnl probably points to the actual function code. Finding the function code may be as simple as that, but most of the time, it isn't. There are a few Nt exports that do not point to the actual function code.
